QWD M5 wire drive unit

Wire drive unit for use in rough environment

The QWD M5 QINEO wire drive unit is part of the new generation of the QINEO NexT wire drive units for manual welding. The housing has a completely revised design. The consistent separation of the media supply to the wire feed distance as well as the encapsulation of all electrical and electronic components give the QWD M5 a maximum of resistance. This makes the QWD M5 the optimal wire drive for demanding applications in rough environments.

- **Light and compact:** Easy handling
- **Inner connections:** Long service life
- **Separation of the media supply to the wire drive:** Robust construction
- **Tool-free change of the wire coils:** Quick change of consumables

QINEO MasterPlus: Manual welding in perfection

- **Intuitive operation:** Clear display for maximum ease of operation, optimised for manual welding
- **Job favourites:** Very quick access to the 5 most important personal settings
- **Memory for 4 welding circuits:** The same welding settings at different workstations ensure the weld quality without an additional calibration of the set welding parameters.

Protected connections

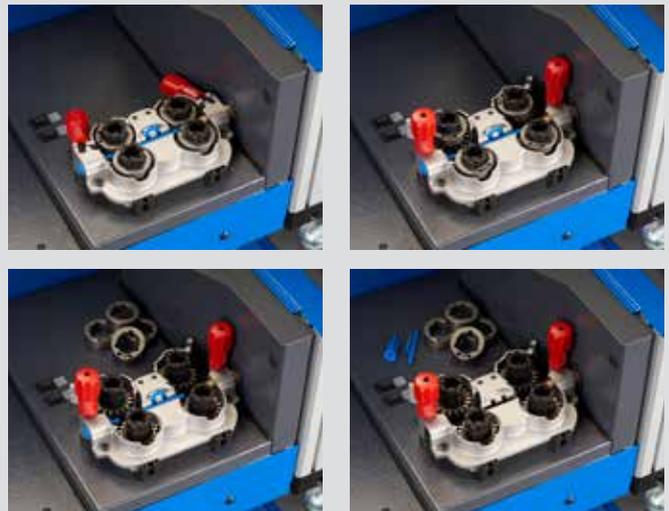

- Protection of the connections from external influences
- No interfering edges in mobile use

Double bottom

- Separate supply of the coolant to protect the mechanical and electrical components

Tool-free change

- Easy and quick change of all consumables

Ready for welding

QINEO NexT Master with QWD-M5 and MHW-410 Premium

The configuration possibilities of the QINEO NexT are as flexible as the welding applications are versatile. This is guaranteed by the consistently modular product concept. From the capacity class to the wire tip, each QINEO NexT is customised. A QINEO NexT, exactly as you need it to cope with your tasks quickly and efficiently.

All over the world!
